SIRAJ ABID

FULL STACK DEVELOPER & GENERATIVE AI ENGINEER

sirajabid641@gmail.com | +92 328 7303593 | Muslim Town, Lahore, Pakistan

PROFILE SUMMARY

Full Stack Developer and Generative AI Engineer with hands-on experience developing scalable web and mobile applications and AI-powered microservices solutions. Experienced in designing end-to-end applications, integrating third-party services, building cloud-ready systems, and working across frontend, backend, database, and deployment layers. Strong problem-solving skills with a core focus on performance, maintainability, clean architecture, and delivering production-ready software for real-world use cases.

WORK EXPERIENCE

MAGMAIC | **MEARN Stack Developer** Lahore, Pakistan

- Developed and deployed 2+ full-stack applications, including a guest posting platform and classified ads system using the MERN stack.
- Engineered responsive interfaces with React.js and Next.js, while developing backend services using Node.js and Express.js.
- Designed and integrated 15+ RESTful APIs, implementing core application functionality, database operations, and authentication logic.

GrowCoder Technology | **Full Stack Developer (Clipscutter)** Lahore, Pakistan

- Built and maintained Clipscutter, a YouTube video downloading and clipping platform using Next.js, Express.js, and MySQL.
- Implemented core features including video processing, pricing plans, credit-based usage, subscriptions, and user dashboards.
- Developed an admin dashboard for managing users, subscriptions, credits, pricing, and platform analytics.

EDUCATION

Bachelor of Computer Science 2023 – 2027

University of Agriculture Faisalabad

Final Year Project: SOLVIX — AI-Powered Multi-Agent Platform

- Developing a scalable AI-powered platform for productivity, coding, job searching, and career development using MERN stack and Microservices architecture.
- Building AI agents for chat, web search, coding assistance, PDF and PPT generation, resume analysis, CV generation, Mock Interview, Portfolio Generator, and job recommendations.
- Implementing API Gateway, rate limiting, load balancing, Stripe subscriptions, credit-based usage, and microservices to support a secure and scalable platform.
- Using Redis, Docker, and Nginx for application performance, deployment, and service management.
- Designing and integrating RESTful APIs and scalable backend services to support AI workflows, user management, subscriptions, and platform features.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Redux Toolkit
Backend:	Node.js, Express.js, RESTful APIs
Database:	MongoDB, MySQL, Redis
Mobile:	React Native, Expo
AI / GenAI:	LLMs, AI Agents, LangChain, LangGraph, RAG, Vector Embeddings, Gemini API, OpenAI API
Architecture & DevOps:	Microservices Architecture, Monolithic Architecture, Docker, Nginx, CI/CD, AWS (EC2, ECS, ECR, IAM), Git, GitHub, Vercel, Postman

KEY PROJECTS

SOLVIX | AI-Powered Multi-Agent Platform (MERN, Microservices, GenAI)
Developed a scalable multi-agent AI platform for productivity, coding, web-search, and career development using MERN Stack, LangChain, LangGraph, Redis, Docker, and Nginx. Implemented Stripe subscriptions, credit usage, API Gateway, and microservices architecture.

WebGen | AI Website Generator (MERN)
Built an AI-powered prompt-based website generator creating fully functional websites from text prompts. Real-time preview, code view source, and Stripe payment integration for premium features.

SirajBook | Social Media Application (MERN)
Engineered a full-featured social media platform with Instagram-inspired UI. Implemented post creation, like/comment system, and real-time notifications using Socket.io (supporting 100+ concurrent users).

SirajVerse | Professional Networking Platform (MERN)
Developed a LinkedIn-style networking platform with AI-enhanced profile recommendations. Features include profile management, content sharing, connection requests, and AI search.

Code Runner | Browser-Based Online IDE (MERN)
Built a browser-based code editor supporting live execution of HTML, CSS, and JavaScript. Improved real-time output compilation speed, reducing feedback loop for learners by 50%.

MSB Bank Management | Banking System (MEAN)
Designed full-featured banking system featuring user authentication, account creation, transaction management (deposits, withdrawals, transfers), simulated ATM card system, admin dashboard, and customer chatbots.

Echo Market | Mobile Marketplace (React Native)
Cross-platform mobile marketplace app using React Native and Expo. Integrated image uploads, product listings, smooth paginated browsing, achieving 60 FPS on mid-range Android devices.

ACHIEVEMENTS

- Developed 10+ full-stack web applications using the MERN Stack, covering diverse real-world business requirements.
- Strong expertise in RESTful APIs and MVC Architecture, with experience in database design and scalable application development.
- Expanded technical expertise from MERN development into Generative AI, Microservices, Cloud, and DevOps, applying these technologies across practical projects.
