- PYTHON, FLASK

Work Experience

MAGMA3C | MERN Stack Developer
June 2025 – Present (3 months)
Developed a guest posting website and a free ads platform using the MERN stack, allowing users to share content and post listings seamlessly.

Profile

Hi, I am Siraj Abid, a Full-Stack Engineer with experience in MERN stack, MEAN stack, React Native, and Python. I have developed numerous responsive and dynamic websites across different platforms. My work focuses on building efficient, user-friendly, and modern web and mobile applications.

PROJECTS

Sirajbook MERN Webiste

SirajBook is a modern social media website built using the MERN stack, designed with an Instagram-like interface. It allows users to share posts, like and comment, and enjoy real-time social interaction.
